DENTAL ASSISTING

education that works!

The Dental Assisting Program is a three semester program, and admits students twice a year in August and January.

The program learning components are competency based and include a combination of theory classes, laboratory classes, operatory skills practice, and clinical externships. Students must master all of the tasks to complete the program successfully. This program prepares students to assist the dentist at the chair side in the dental operatory, perform reception and clerical functions, and selected laboratory work. In addition, the student will gain skills required for direct patient care such as taking x-rays and impressions, preventive education, and nutritional counseling.

Note: students must be age 18 before enrolling in DEA 125 & DEA 131, as directed by the Colorado Board of Dental Examiners Rule & Regulations. Simulated clinical situations are practiced prior to actual clinical assignments. Clinical assignments will include work in a variety of private dental offices and clinics.

Accreditation

The Commission on Dental Accreditation has determined the Dental Assisting program's accreditation status to be "approved without reporting requirements". Upon successful completion, the student will qualify to take the Dental Assisting National Board Exam.

The following certificates may be earned:
