ADVANCED MANUFACTURING

The Advanced Manufacturing Program consists of classroom and shop learning experiences which will permit the student successfully completing the program to be qualified as an entry-level machinist. Major contact areas covered in the program are machine shop safety; measuring instruments; blueprint reading; operation of general machine tools such as lathe, mills, saws, lathes, solidworks, 3D printing, laser engraving, design/ manufacturing and certification. In addition, students will gain valuable experience in the Job Shop course through the design and production of customer projects. (Hours to be arranged by Instructor). A focal point of the Advanced Manufacturing Program is instruction in the programming set-up, and operation of the computer numerical control (CNC) equipment, as well as learning the basics of 3D Printing and Laser Engraving. Apprenticeships may be available with local machine shops and manufacturing businesses.
