

a great
place
to start for

EARLY CHILDHOOD EDUCATION

The Early Childhood Education Program is designed to provide the skills needed to secure employment as a teaching assistant in a childcare center, preschool, or elementary school. Students enrolled in the program receive training in the classroom setting and in the on-site licensed child care facility. Leadership skills are taught through the integration of the FCCLA student organization. Students considering a career in education, child psychology, pediatric medicine, social work, or other child-related occupations are encouraged to enroll in the ECE program. Students who successfully complete the ECE Program may earn transferable college credit to any participating community college in the state of Colorado if certain grade requirements are met.

Early Childhood Education is a Highschool student only program

ECE has a "Program Articulation Agreement" with the Colorado Community College System. The benefit agreement provides a smooth transition for secondary students who wish to continue their education after graduation in a post-secondary transfer or career and technical program.

The student must submit a completed Name of College application form including a copy of their high school transcript and the verification sheet attached from the high school Family and Consumer Sciences instructor. Students must have met all of the competencies for the course at the High School. A student transcribing articulated credits to Colorado Community College must have a minimum grade of "B" (80%) or better to receive articulated credit. This course will be accepted as if it was completed at the college.

The Early Childhood Education 101 course which has been approved for articulation credit in this agreement will be transcribed with appropriate course title: Early Childhood Education 101.
