- ▶ Afternoon: 12:05pm - 2:55pm, Mon. - Fri.

SEMESTER 1

VET 1002 Veterinary Medical Terminology

1 credit

Introduces veterinary medical terminology: common prefixes, roots, suffixes; covers body systems, oncology, psychiatry, labs, diagnostics, imaging; teaches pronunciation and clinical usage.

VET 1009 Applied Comp Animal Behavior

3 credits

Companion animal behavior and learning theory to enhance interspecies communication, reduce fear and stress, and apply evidence-based training in veterinary care.

VET 1016 Humane Treatment and Handling

3 credits

Humane animal handling in a veterinary clinic, including restraint, medication administration, and routine clinical procedures performed by veterinary technicians.

VET 1020 Office Procedures and Relations

2 credits

Common clinical procedures, focusing on the veterinary technician's role in patient care and record management, plus an introduction to veterinary management software and online veterinary services.

VET 1075 Special Topics: Medical Math Applications

3 credits

VET 1082 Internship

2 credits

Allows students to gain practical, supervised work experience related to their program, working at the business under experienced staff and guided directly by their instructor.

SEMESTER 2

VET 1004 Assist Large Animal & Handling

1 credit

Covers common medical and surgical conditions in large animal species, emphasizing the veterinary assistant's role and essential handling and technical skills required for the profession.

VET 1014 Vet Assist Lab & Clinical Procedures

3 credits

Covers essential laboratory and diagnostic imaging procedures in a veterinary hospital, emphasizing support roles for veterinarians and veterinary technicians in performing and assisting with these tasks.

VET 1083 Internship

6 credits

Allows students to gain practical, supervised work experience related to their program, working under experienced staff at the business and receiving direct instructor guidance.

VET 2023 Intro to Vet Anesthesia

1 credit

Covers veterinary anesthesiology fundamentals: technician roles, anesthesia types, equipment preparation, preoperative patient management, and intraoperative monitoring and documentation.

VET 2032 Veterinary Dentistry

1 credit

Dental anatomy, exams, common problems, cleaning equipment/procedures, technician roles in professional cleanings, client education, and preventive home care.
