MULTIMEDIA GRAPHIC DESIGN

education that works!

The Multimedia Graphic Design program prepares students for a variety of print and digital related career paths that include graphic design, web design, illustration, layout and print design. First semester students will focus on design principles, the study of typography and color theory practices as well as learn how to use two software components for photo manipulation and digital art creation. Second semester students will learn to operate a variety of cutting edge software programs used by designers in conjunction with design related projects based around logo design, web design, animation and illustration. Students will learn to operate all software on both MAC and Windows based platforms.

Second year students develop and refine their design and software skills through a variety of projects that include poster design, annual reports, ad layouts, ad campaigns, web design, skills needed to be a freelance designer and becoming a freelance designer and assembling a professional portfolio for employability.

Prerequisite: Keyboarding skills, basic computer operating and file management skills. The ability to use a T-square, ruler and French curve for hand rendered compositions. Basic hand drawing and illustration skills. Strong reading and writing skills.

The following certificate may be earned:

Multimedia Graphic Design

Post Secondary Program Requirement: Students must have a laptop that can run the Adobe Creative Cloud Software. Adobe CC is the software that is used in the program as well as an industry standard for the creative field.

For a full list of system requirements go to:
